OFFERING TO SWAMI

With love and deep gratitude , I offer my prayerful pranams at the divine lotus feet of our dearest, loving, and omnipresent Lord, Bhagawan Sri Sathya Sai Baba, and humbly submit this Group-3 project at His lotus feet.

I pray to swami to kindly forgive any unknown mistakes committed by me and to graciously accept this project, which I offer with a most humble and devoted heart.

I feel blessed and joyful to be doing this Group-3 project, and I am proud to be called Swami's student throughout my life.

My dear Swami, please guide me and help me to complete this project successfully. I once again offer my reverential pranams to Your holy lotus feet.

OM SRI SAI RAM

THIS PROJECT ON NATURE GIVEN ME A GOLDEN OPPORTUNITY FOR LEARNING AND SELF DEVELOPMENT. WE ARE THANKFUL TO SWAMI WHO HELPED US, AND WE ARE ALSO THANKFUL TO OUR PARENTS AND BALAVIKAS GURUS TO MAKE THIS PROJECT WITHOUT THEIR HELP WE CANNOT COMPLETE THIS TASK.. WE WISH TO THANK ALL OUR FAMILY MEMBERS WHO REALLY HELPED ME BY GIVING SUGGESTIONS AND CRITICAL REVIEW OF THE MANUSCRIPT OBVIOUSLY. THIS ACHIEVEMENT WAS NOT POSSIBLE WITHOUT ALL OF YOU.

INTRODUCTION:

Nature is the physical world and all living things ,including plants, animals, landscapes, and the forces of the universe, that are not made by humans. It encompasses everything from the subatomic to the cosmic and is essential for human survival, providing resources like food, water, and air . Nature is also a source of inspiration and prance, with its beauty and the interconnectedness of its system providing a sense of wonder and reminding us of our place in the world .

WHAT IS NATURE?

The word **nature** refers to all the animals, plants, and other things in the world that are not made by people, and to all phenomena that are not influenced by human intervention.

Nature is abundant with millions of different living species around the Earth. Nature refers to the interaction between the physical world and the life within it like animals, plants, and humans.

The word "**nature**" has its roots in the Latin word "**natura**", which means "essential qualities, innate disposition," and literally translates to "**birth**".

IMPORTANCE OF NATURE:

Nature is one of the important and valuable gifts given to us by God. It is the foundation of life on Earth. Everything we need to survive-- air, water, food , sunlight , and shelter – comes from nature. without nature , human life would not be possible .

NATURE'S IMPACT :

Pollution causes numerous health problems, including respiratory diseases like asthma and COPD, cardiovascular issues such as heart attacks and strokes, and increases the risk of cancer. It can also lead to neurological damage, reproductive problems, and premature death. Invisible particles can enter the bloodstream and damage organs like the heart, brain, and lungs.

Health effects of pollution

THREAT TO NATURE :

1. **Habitat Loss & Degradation:** Deforestation for farming, mining, and urban sprawl destroys habitats, fragmenting ecosystems and driving species extinction.
2. **Climate Change:** Rising temperatures, extreme weather, and sea-level rise disrupt natural systems, making it the future dominant cause of biodiversity loss.
3. **Pollution:** Plastic, chemical, air, and water pollutants poison wildlife and ecosystems, impacting marine life and even human food sources.
4. **Overexploitation:** Unsustainable harvesting, overfishing, and poaching deplete natural resources and wildlife populations.
5. **Biodiversity Loss:** The rapid extinction of species due to the above factors, ecosystem resilience and the planet's life support systems
6. **Disease:** Human-induced ecosystem disruption increases contact between wildlife, stock, and humans, raising the risk of zoonotic disease like ebola, nipah.

NATURE AS A MANIFESTATION OF GOD :

Nature as god's creation refers to the belief that the natural world is a direct manifestation of a divine presence, designed and sustained by a higher power. This concept emphasizes the inherent goodness and beauty of nature, viewing it as a reflection of God's will and purpose.

OM SRI SAI RAM

You must realize that
nature
is a manifestation of
God.

- **"The poetry of the earth is never dead." – John Keats.**
- **"The beauty of the natural world lies in the details."
– Natalie Angier.**

OM SRI SAI RAM

WHY I CHOOSE THIS TOPIC :

Nature is fundamental to our lives, providing essential resources like food, water, and shelter, and also offering crucial benefits for our physical and mental well-being. It sustains us by regulating the climate, producing clean air, and offering a space for recreation and inspiration, while also playing a significant role in our cultures and identities

Nature is God's body and a great teacher, revealing the Divine through its perfect, selfless actions (trees bearing fruit, rivers flowing) and elements (fire treating all alike).

-SWAMI

Practical Application:

Practice a "ceiling on desires" to avoid excessive consumption and protect the environment.

Cultivate the "spirit of sacrifice" seen in nature.
Show reverence and gratitude, realizing that protecting nature is protecting God.

OM SRI SAI RAM

"Nature is your school, your laboratory, the gateway to liberation, and the panorama of God's majesty. Seek to know the lessons it is ready to teach."

"The human body has been given to man to help others... Trees, rivers, and cows help others without any trace of selfish motive."

"To see God in Nature, the mirror has to be coated with the mercury of love."

When you see a mountain, waterfall or forest, you feel happy. All these proclaim the presence of the Diviner. Light shines, the stars twinkle, the sun blazes, the plantes revolve in their orbits. All these phenomena are manifestations of the Divine. By understanding the nature of flame, you can understand the nature of fire. By examining a drop of water, you come to know the nature of the Ganges. Likewise by understanding Manservant (the true nature of humanness), you can understand Daivathvam (Divinity) .

CONCLUSION

During my journey of this project, Balavikas has given me a chance to understand Nature as divine entity. Baba has given us the insight of Nature and consequences of Human intervention. there is need for protecting our own selves, We have to protect Nature

+

Vrukshe Rakhathi Rakshitaha

We have to protect Trees and our attitude towards Nature as a gift given by God to all the beings over generations Hence, Our action towards should be Dharma Rakshathi Rakhita:

Whoever protects Dharma/ Nature, Will be protected. Without wasting the Nature resources, “Ceiling on desires” reducing the Needs - I wish to reduce the depletion of resources I wish to promote ecofriendly activities through my friends and in family and help for future for sustainably development. I thank Swami for giving me an opportunity to understand nature and in action I do my responsibility towards Nature.
